4 July 2012

Mike Bailey's colours are contagious!

If you've not ventured into Mooroopna's Pizzeria and Wine Bar lately, take a look to see the paint colours Mike Bailey has used. This modern 2-level eatery in the heart of town was completely transformed when it was refurbished in late 2009.

The project took 4 weeks to create colour and atmosphere to this new look café that has expansive premises. Working to design specifications, this included internal and external painting and rendering. Feature walls had to blend with contemporary furnishings, a large staircase and a 2nd level balcony.

Mike is a leading Master Painter who recently retired as President of Master Painters Victoria. When it comes to painting and decorating he has sourced the best of the best paints and decorative finishes for Mooroopna residents.

Mike is also an environmental paint specialist who works in sustainable options. Heat reflective and fire retardant solutions for many building types of all ages are now a practical way to solve problems. By reducing the internal temperatures of buildings, cost savings on energy bills are a reality. Also, a new fire retardant "passive fire protection" product, uses water based films with acrylic fire resistant components.

Mike's work is highly regarded and his staff are trained and employed with all the correct certifications. For more information: www.mikebailey.com.au [03] 5825 5444 or visit the Paint & Decorating Shop at 17 Toolamba Road, Mooroopna.

Revised: 5.7.13
