

## MIKE BAILEY PAINT SERVICES – ENERGY STAR PROJECT PROFILE & TESTIMONIAL

### K20 Architecture South Melbourne

**Project:** South Melbourne Office  
External walls  
Roof

**Time:** Oct-Nov 2008

#### **Description:**

This 100 year old historic white stone house with a tin roof is the office of K2 Architecture, located near the South Melbourne market. The building required painting of external walls and roof.

In both instances, **Energy Star heat reflective paint** products were used.

#### **Further Comment:**

K20 Architecture since specified the Energy Star product for their Austin & Dandenong Private Hospital client for work undertaken in 2009.

#### **Testimonial from K20 Architecture**

*At K20 Architecture we are always looking for quality products and services. Our client base ranges from hospitals to schools throughout Victoria and we pride ourselves in being environmentally focused.*

*Mike Bailey Paint Services was engaged to paint our office in South Melbourne in Energy Star Heat Reflective paint on the roof and walls. Mike and his team were prompt, neat, friendly and worked very efficiently. The work site was left clean and tidy.*

*We are extremely happy with the quality of work. Our work environment is much more comfortable during the summer months. As we are environmentally focused Architects, it is satisfying to know we have used products that are low in VOC's and will not need to be painted for more than 20 years. Our maintenance and energy costs have been greatly reduced. The colour range is extensive and very easy to work with.*

*We are proud to refer **Mike Bailey Paint Services** and **Energy Star Paints** to our clients.*

Regards

Theodore Kerlidis – Senior Partner
